WORK STUDY SESSION

North Central Traffic Protection Plan

George Alvarez, Transportation Development Engineer, presented the salient points of a Traffic Protection Plan for the area bounded by the Santa Ana River, the Santa Ana Freeway and 17th Street, indicating the Plan had been a year in formation. He noted the purpose of the Plan was to discourage commuter traffic through the neighborhood and outlined staff's recommendations for achieving that purpose through such methods as traffic signal timing, street-striping, addition of four-way stop signs and peak hour turning prohibitions. Councilmembers questioned Mr. Alvarez concerning the differences between staff's recommendations and Planning Commission recommendations relative to the Plan, and commented upon specific aspects of the proposal.

Councilmember Luxembourger suggested staff investigate possibilities for installing bus turn-outs and left-turn lanes along Bristol Street; Councilmember Hart remarked that he would prefer more advance information on projects of such magnitude as the Plan.
